1963 Index to Feature Articles

Volumes 57 & 58 Jan-Dec 1963

ALUMINUM AND ITS ALLOYS

Corrosion resistance data—Jan, p 106
Designing with extruded aluminum—Apr, p 94
Flame spray gun—May, p 115
How to prepare surfaces for adhesive bonding—Nov, p 100
How to select a prepainted metal—Dec, p 106
Materials for buoyancy, Selecting—Oct, p 85
More data on new aluminum alloys—Dec, p 81
Premium quality castings—Aug, p 99
Sprinkler alarm redesign cuts weight 68%—July, p 75
Stronger weldable aluminum alloys, Two—May, p 94

BERYLLIUM

Cadmium plating without embrittlement—June, p 86
Preventing corrosion by liquid metals—Nov, p 97

CARBON, GRAPHITE

Activated carbon now in sheet form May, p 93
Corrosion resistance data—Jan, p 106
Preventing corrosion by liquid metals—Nov, p 97

CASTINGS

Castings as art—Dec, p 85
DAP resin makes castings pressure-tight—June, p 78
Flame spray gun—May, p 115
Flaws no key to casting failures—Nov, p 88
Home movie projector—May, p 114
Maraging steel for castings, A—Jan, p 143
Mass production of investment castings?—Jan, p 141
Metal nameplates: keeping cost down—Mar, p 85
Premium quality castings—Aug, p 99
Specialty Metal Shapes—Oct, p 109
Sprinkler alarm redesign cuts weght 68%—July, p 75

CERAMICS, GLASS

Boron nitride made in large shapes—May, p 91
Ceramic-coated metals resist heat, corrosion—Nov, p 85
Corrosion resistance data—Jan, p 106
Flake glass coating resists corrosion—May, p 95
Flame sprayed alumina, Three uses for—Feb, p 73
Immersible electric serving platter—May, p 102
Materials for buoyancy, Selecting—Oct, p 85
Refractory ceramics, Guide to—July, p 85
Substrate materials for thin film circuits—Aug, p 95
Translucent alumina stays strong at 3600 F—Apr, p 98

COATINGS, FINISHES

Ceramic-coated metals resist heat, corrosion—Nov, p 85
Coatings to prevent corrosion—Jan, p 104
Corrosion resistance data—Jan, p 106
Epoxy coatings are solvent-free—Dec, p 94
Flake glass coating resists corrosion—May, p 95
Flame sprayed alumina, Three uses for—Feb, p 73
How chrome plate performs outdoors—Dec, p 100
How to select a prepainted metal—Dec, p 106
Materials for hydrofoils? Which—May, p 88
New process gives tailored coatings—Oct, p 90
Painting galvanized steel—Oct, p 96
Tarnish-free copper—Jan, p 139
Titanium coatings protect metals—Mar, p 81
Water-reducible paints today—Dec, p 97
What's new in brush plating—Dec, p 102
What's new in coatings and finishes—Apr, p 109

COMPOSITES (not classified elsewhere)

Composites, The promise of—Sept, p 79
Molded electron gun—May, p 120
Materials for hydrofoils? Which—May, p 88
New process gives tailored coatings—Oct, p 90
Sprinkler alarm redesign cuts weight 68%—July, p 75
TFE-metal laminate in coils—Dec, p 104
Thermoplastic laminate for structural use—June, p 90

COPPER AND ITS ALLOYS

Corrosion resistance data—Jan, p 106
Flame spray gun—May, p 115
High strength copper-nickel resists corrosion—Dec, p 90
How to prepare surfaces for adhesive bonding—Nov, p 100
Sprinkler alarm redesign cuts weight 68%—July, p 75
Strong copper alloys, Two—Feb, p 84
Tarnish-free copper—Jan, p 139
The truth about Miss Liberty—June, p 80

CORROSION RESISTANT PROPERTIES AND MATERIALS (see also stainless steel)

Ceramic-coated metals resist heat, corrosion—Nov, p 85
Coatings to prevent corrosion—Jan, p 104
Corrosion resistance data—Jan, p 106
Corrosion terms you should know—Jan, p 122
Designing to prevent corrosion—Jan, p 100
Evaluating materials for corrosive service—Jan, p 92
Flake glass coating resists corrosion—May, p 95
High strength copper-nickel resists corrosion—Dec, p 90
Many faces of corrosion, The—Jan, p 85
Materials for hydrofoils? Which—May, p 88
Preventing corrosion by liquid metals—Nov, p 97
Titanium coatings protect metals—Mar, p 81
The truth about Miss Liberty—June, p 80
Universal mechanical seal—May, p 119
What's new in coatings and finishes—Apr, p 109
What we do and don't know about corrosion—Jan, p 99

ELECTRICAL AND ELECTRONIC PROPERTIES AND MATERIALS

Data on superconducting alloys, New—Apr, p 92
High permeability nickel-iron alloys—July, p 76
Plastics that conduct electricity—Oct, p 100
Substrate materials for thin film circuits—Aug, p 95

EXTRUSIONS

Designing with extruded aluminum—Apr, p 94
Specialty metal shapes—Oct, p 109

FABRICS, FIBERS, FELTS

Coated fabrics—can they solve your diaphragm problem?—Feb, p 79
Composites, The promise of—Sept, p 79

FORMING

Blow molding, A guide to thermoplastics for—Mar, p 92
Explosive formability: four ways to improve it—Feb, p 67
Specialty metal shapes—Oct, p 109

HEAT TREATMENT

Mar-straining strengthens steels—July, p 67
New approach to high temperature strength—Oct, p 104

HIGH TEMPERATURE PROPERTIES AND MATERIALS

Aerospace fluids and lubricants, New—Aug, p 77
Boron nitride made in large shapes—May, p 91
Ceramic-coated metals resist heat, corrosion—Nov, p 85
Cobalt alloy adds 100° F, New—Apr, p 104
Composites, The promise of—Sept, p 79
Flame sprayed alumina, Three uses for—Feb, p 73
Heat Resistance of Plastics, New data on—Apr, p 100
Nickel alloy for 1900 F—May, p 85

1963 Index *(continued)*

Polymer looks good for 1000 F, New—May, p 92
Refractory ceramics, Guide to—July, p 85
Refractory good to 3600 F—Feb, p 82
Single crystals as engineering materials—Mar, p 86
Steel is strongest yet at 1200 F, New—May, p 96
Superalloy is weldable, resists cracking, New—Dec, p 88
Translucent alumina stays strong at 3600 F—Apr, p 98
Transmissions to operate at 1200 F—May, p 104
Ultra high strength materials—Mar, p 101
What's new in coatings and finishes—Apr, p 109

IRONS

Corrosion resistance data—Jan, p 106
High permeability nickel-iron alloys—July, p 76
Preventing corrosion by liquid metals—Nov, p 97

JOINING AND FASTENING

Encapsulated thermoelectric generator—May, p 116
Fastening reinforced plastics—Feb, p 85
How to prepare surfaces for adhesive bonding—Nov, p 100
Rupture stresses for welded tubing—Feb, p 76
Untreated polyethylene joined to metals—Feb, p 83
When to braze—Aug, p 87

MAGNESIUM AND ITS ALLOYS

Corrosion resistance data—Jan, p 106
How to prepare surfaces for adhesive bonding—Nov, p 100
Magnesium alloy index—Mar, p 99
Premium quality castings—Aug, p 99

MOLDING, MOLDINGS

Blow molding, A guide to thermoplastics for—Mar, p 92
Hollow parts molded of polyethylene—Feb, p 70
Parts molded, decorated in one step—Apr, p 90
Precision molded plastics—Oct, p 93
Premix or preform moldings?—Dec, p 77
Wood molded into large, complex parts—Apr, p 105

MOLYBDENUM AND ITS ALLOYS

Corrosion resistance data—Jan, p 106
Preventing corrosion by liquid metals—Nov, p 97

NICKEL AND ITS ALLOYS

Corrosion resistance data—Jan, p 106
Design data on TD nickel, New—Aug, p 81
High permeability nickel-iron alloys—July, p 76
How to prepare surfaces for adhesive bonding—Nov, p 100
Materials for hydrofoils? Which—May, p 88
New approach to high temperature strength—Oct, p 104
Nickel alloy for 1900 F, A—May, p 85
Preventing corrosion by liquid metals—Nov, p 97
Transmissions to operate at 1200 F—May, p 104
Superalloy is weldable, resists cracking, New—Dec, p 88

NONFERROUS METALS (not classified elsewhere)

Beryllium is one-third stronger, New—Aug, p 94
Cobalt alloy adds 100° F, New—Apr, p 104
Encapsulated thermoelectric generator—May, p 116
Mercury alloy freezes at −74 F—Oct, p 105
Single crystals as engineering materials—Mar, p 86
Ultra high strength materials—Mar, p 101

PLASTICS—REINFORCED

Composites, The Promise of—Sept, p 79
Corrosion resistance data—Jan, p 106
Fastening reinforced plastics—Feb, p 85
Heat resistance of plastics, New data on—Apr, p 100
Materials for hydrofoils? Which—May, p 88
Plastic laminates: specifications and standards—July, p 81
Plastic tubing for air cylinders—May, p 108
Premix or preform moldings?—Dec, p 77
Substrate materials for thin film circuits—Aug, p 95

PLASTICS—THERMOPLASTICS

Automatic window actuator—May, p 113
Blow molding, A guide to thermoplastics for—Mar, p 93
Color in plastics—July, p 63
Copy machine designed around plastics—Dec, p 89
Corrosion resistance data—Jan, p 106
Dishwasher screen—May, p 117
Engineering thermoplastics, A guide to—Nov, p 105
Flame spray gun—May, p 115
Hollow parts molded of polyethylene—Feb, p 70
Low cost styrene acrylonitrile, Take a fresh look at—June, p 82
Manually-operated hand sprayer—May, p 106
Materials for buoyancy, Selecting—Oct, p 85
Pinwheel for typewriter platen—May, p 110
Pitfalls in plastic fan designing—Dec, p 133
Plastics key to 12-lb TV—Oct, p 108
Plastics that conduct electricity—Oct, p 100
Polycarbonate plastics, Latest engineering data on—July, p 70
Polyimide plastics for use to 570 F—Jan, p 145
Precision molded plastics—Oct, p 93
Strippable foam protects metal parts—Apr, p 103
Substrate materials for thin film ciruits—Aug, p 95
TFE-metal laminate in coils—Dec, p 104
Thermoplastic laminate for structural use—June, p 90
Untreated polyethylene joined to metals—Feb, p 83
What users think of polycarbonate—Aug, p 89

PLASTICS—THERMOSETS

Color in plastics—July, p 61
Corrosion resistance data—Jan, p 106
DAP resin makes castings pressure-tight—June, p 78
Epoxy coatings are solvent-free—Dec, p 94
Heat resistance of plastics, New data on—Apr, p 100
Parts molded, decorated in one step—Apr, p 90
Plastics that conduct electricity—Oct, p 100
Polymer looks good for 1000 F, New—May, p 92
Premix or preform moldings?—Dec, p 77
Propeller tip seal for fans—May, p 99
Sealant forms tight joints, New—Apr, p 106

POWDER METALLURGY

Composites, The promise of—Sept, p 79
New approach to high temperature strength—Oct, p 104

PRECIOUS METALS

Corrosion resistance data—Jan, p 106
Momentum ring for gyroscope—May, p 112
Precious metals and their uses—June, p 923

RUBBER

Corrosion resistance data—Jan, p 106
Postage machine belts—May, p 118

STAINLESS AND HEAT RESISTING STEELS

Ceramic-coated metals resist heat, corrosion—Nov, p 85
Corrosion resistance data—Jan, p 106
Flame spray gun—May, p 115
How to prepare surfaces for adhesive bonding—Nov, p 100
Mar-straining strengthens steels—July, p 67
Materials for hydrofoils? Which—May, p 88
Preventing corrosion by liquid metals—Nov, p 97
Steel is strongest yet at 1200 F, New—May, p 96
Tougher PH stainless steel—June, p 88
Ultra high strength materials—Mar, p 101

STEELS

Ceramic-coated metals resist heat, corrosion—Nov, p 85
Cheaper steel for low temperatures, A—July, p 82
'Clean' steels, New family of—Jan, p 137
Corrosion resistance data—Jan, p 106
Flame spray gun—May, p 115
Flaws no key to casting failures—Nov, p 88
How to select a prepainted metal—Dec, p 106
Maraging steel for castings, A—Jan, p 143
Mar-straining strengthens steels—July, p 67
Materials for buoyancy, Selecting—Oct, p 85
Painting galvanized steel—Oct, p 96
Premium quality castings—Aug, p 99
Special steel sections—Apr, p 85
Specifying and designing with steel wire—June, p 71
Ultra high strength materials—Mar, p 101

TESTING AND INSPECTION

Evaluating materials for corrosive service—Jan, p 92

Flaws no key to casting failures—Nov, p 88

TITANIUM AND ITS ALLOYS

Corrosion resistance data—Jan, p 106
Materials for hydrofoils? Which—May, p 88
Preventing corrosion by liquid metals—Nov, p 97
Stronger titanium alloy, A—Feb, p 74
Titanium coatings protect metals—Mar, p 81

TUBING

Rupture stresses for welded tubing—Feb, p 76
Specialty metal shapes—Oct, p 109

WOOD

Engineering a harp—Oct, p 97
Plywood primer, A—Nov, p 90
Wood molded into large, complex parts—Apr, p 105

ZINC

Corrosion resistance data—Jan, p 106
Home movie projector—May, p 114

Authors

Anderson, P., Coated fabrics—Feb, p 79
Angell, R. C., 1015 seems suitable for low-temp service—Sept, p 158

Beadle, Jr., E. E., What you can expect now in precision molded plastics—Oct, p 93
Blackham, J. S., When to braze—Aug, p 86
